- Approval Strategy

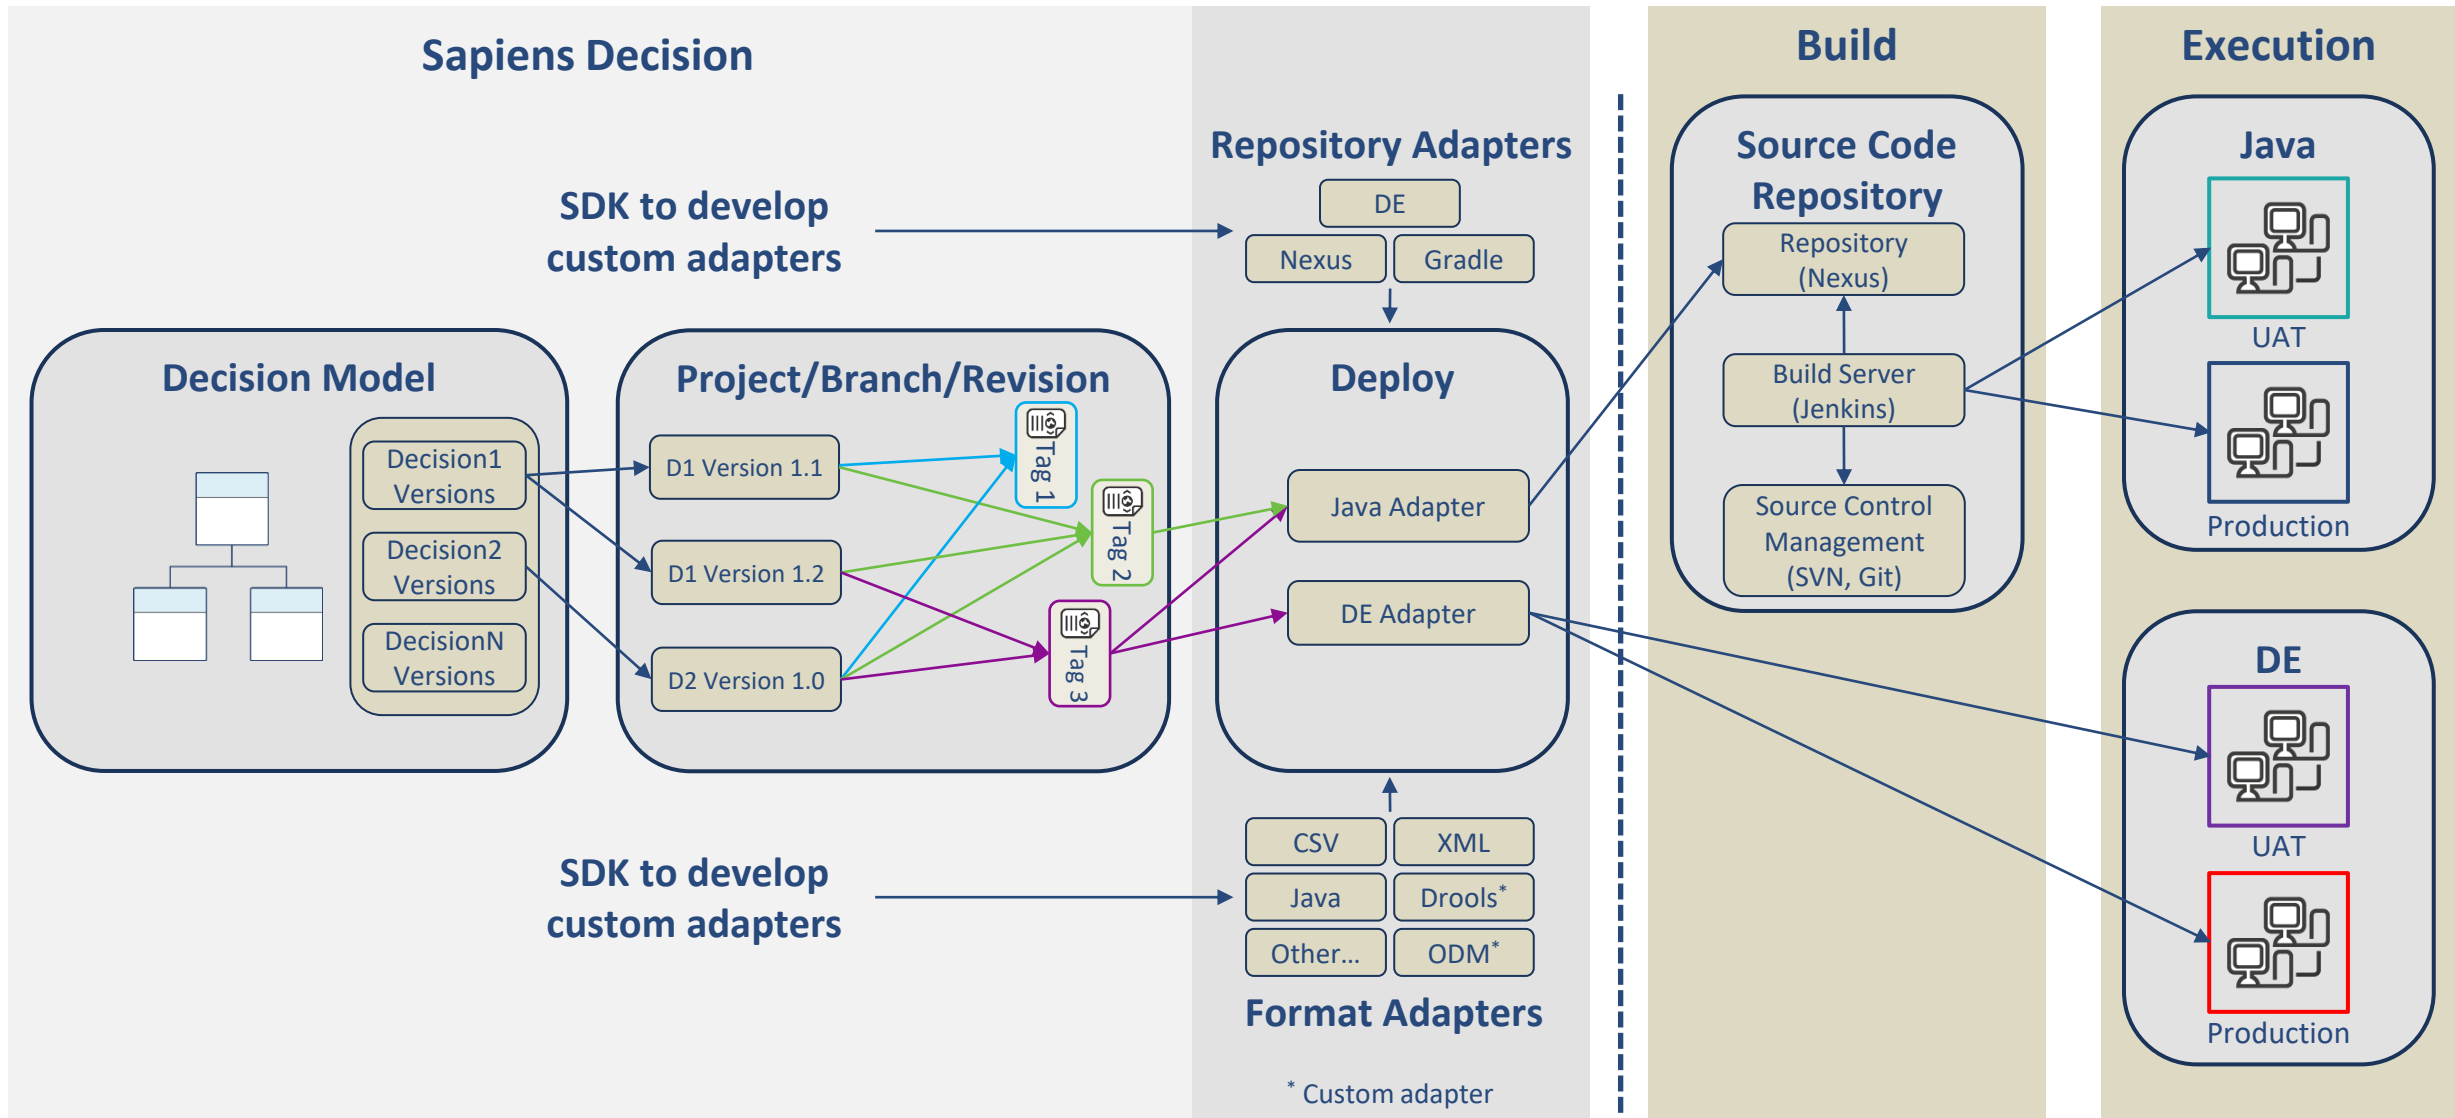

The Modeling Process

Deployment Environment Management

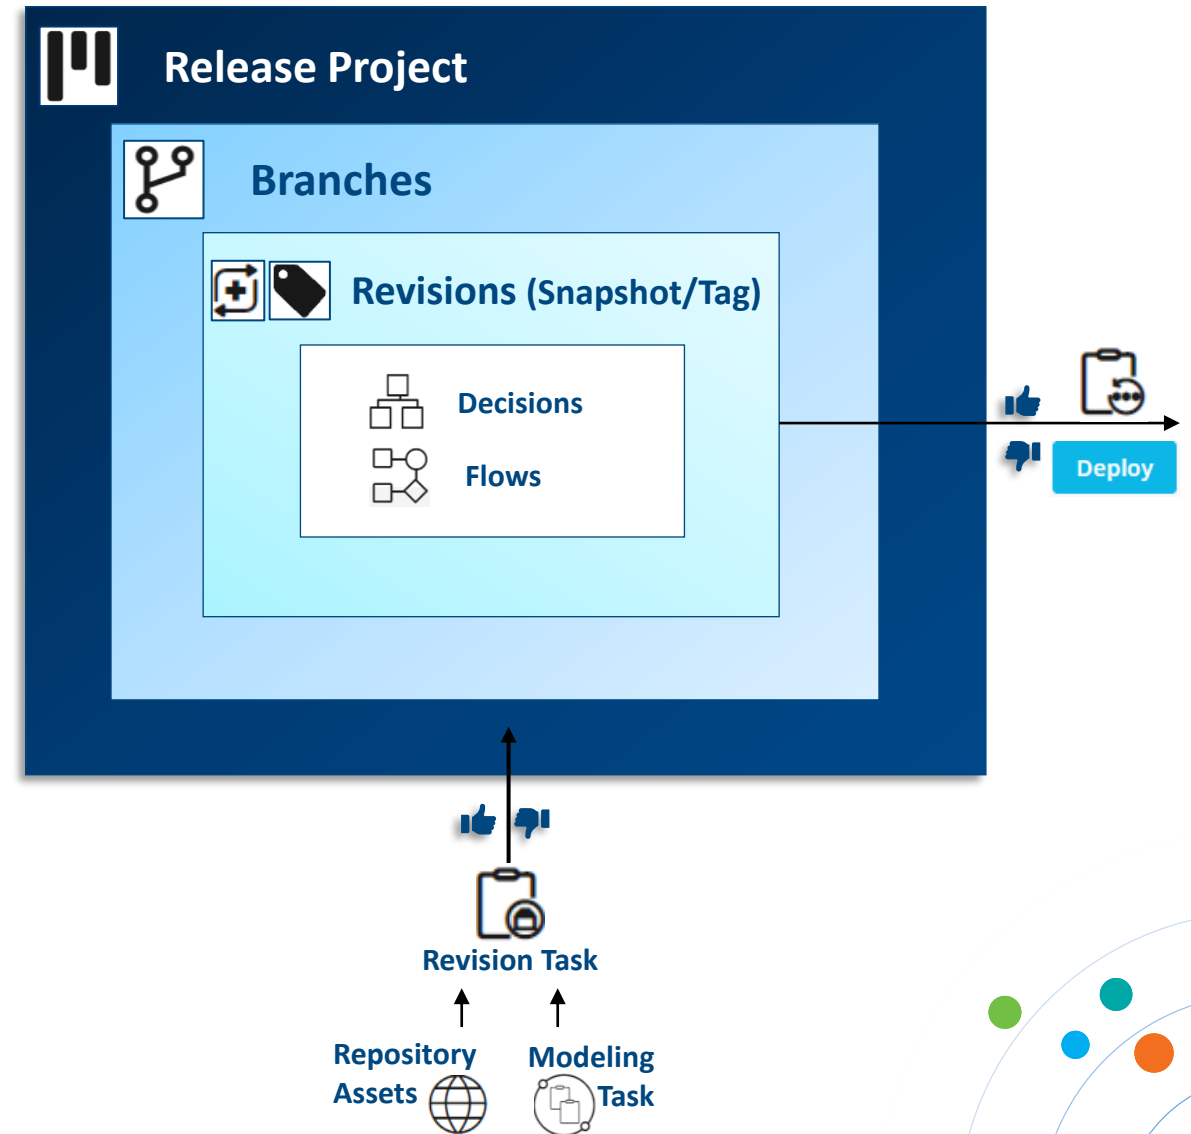

Deploying Executable Logic with Sapiens Decision

Release Management

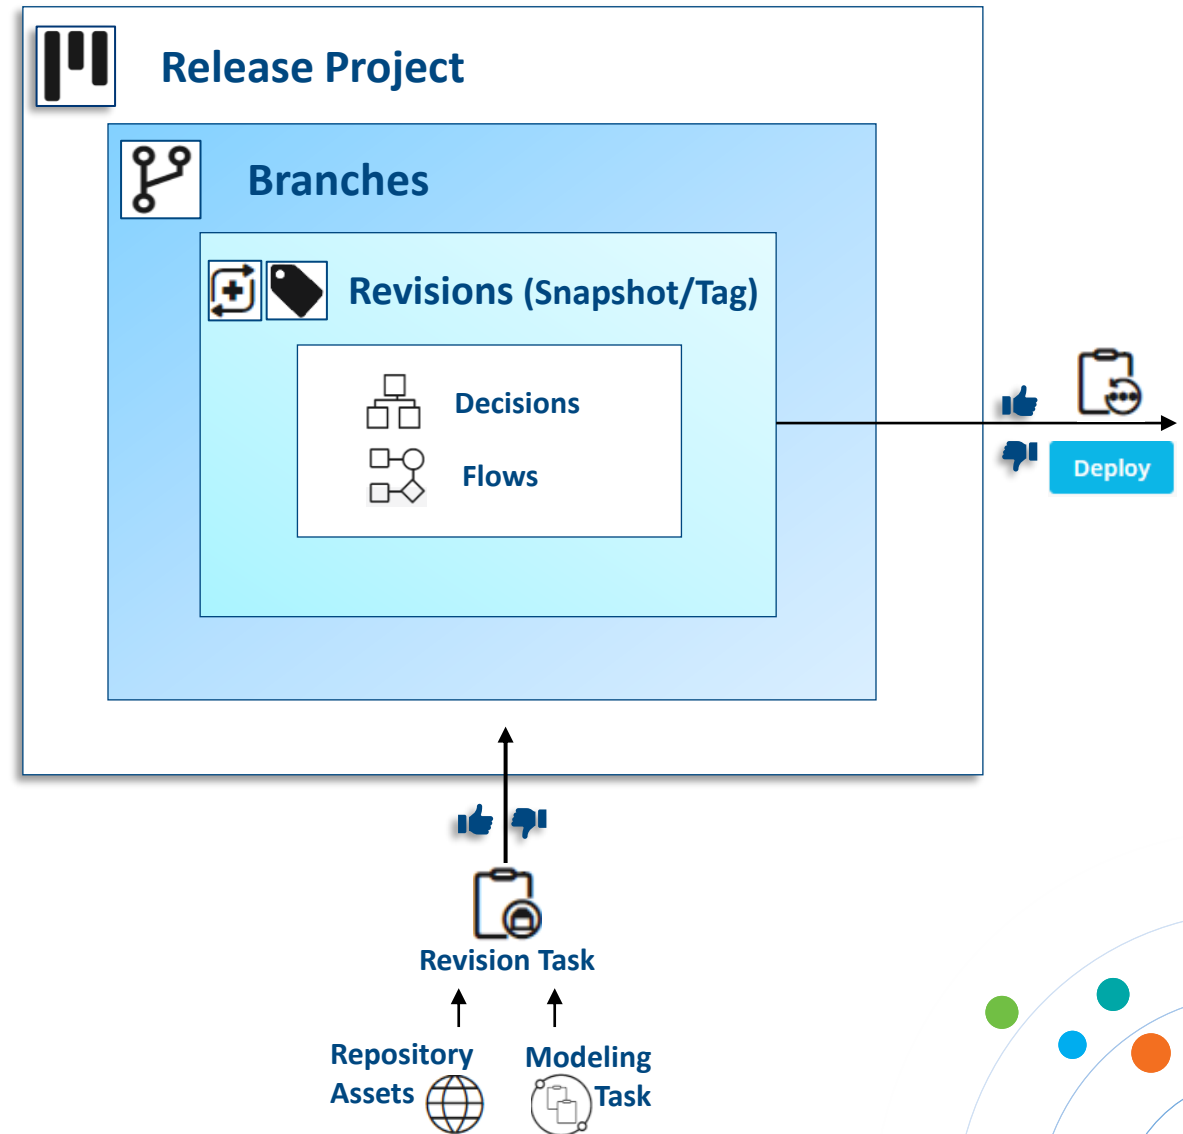

Release Management facilitates fast and easy release building and deploying

Release Project

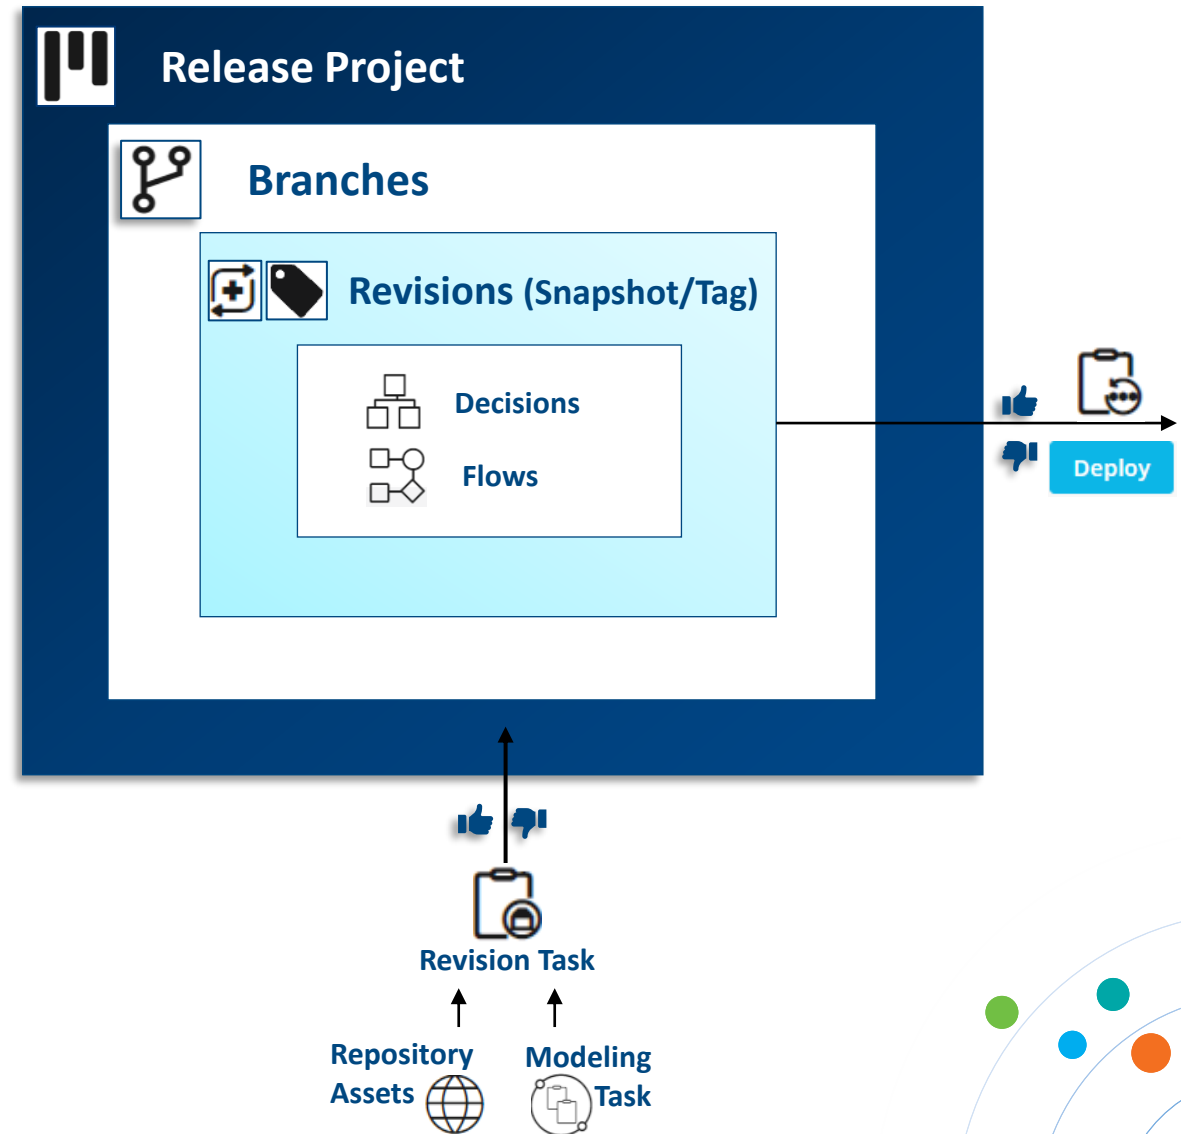

A **Release Project** is a workspace for collaborative management of packaging and deploying Decision assets

- Release Project is defined at Community level
- A Release Project contains Branches
- **Branches** contains Revisions
- **Revisions** contain assets
- A Release Project has owners, responsible for approving changes to its Branches
- A Release Project has Custom Properties
- A Release Project can be retired

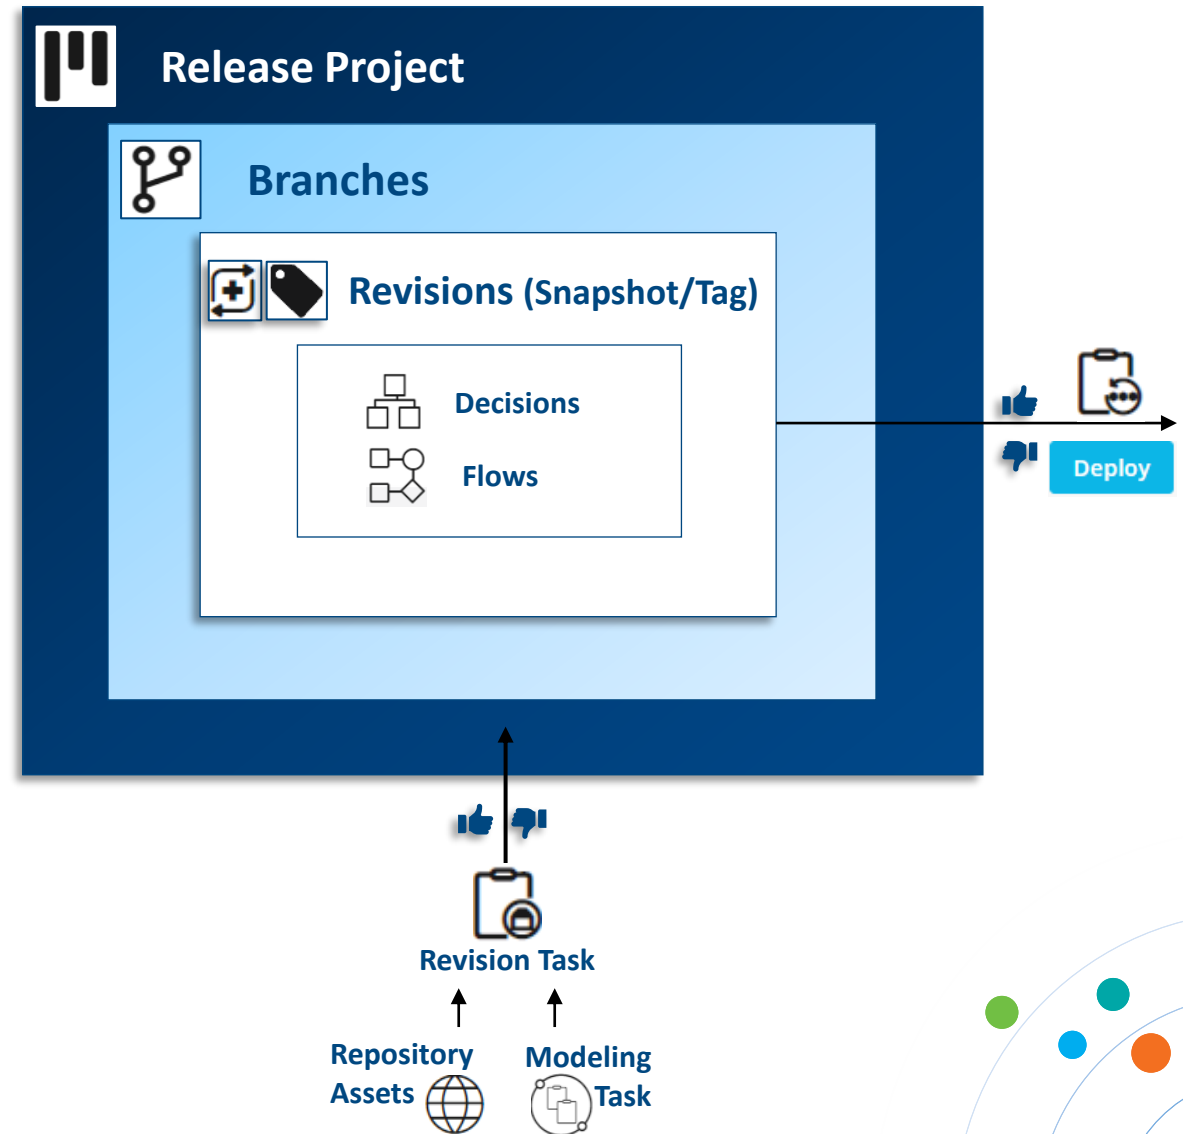

Branch

- A **Branch** is a group of Revisions created one after the other
- A Branch stores data as a series of snapshots (Revisions)
- The 'Main' Branch is the first Branch of a Project
- A Branch name can be changed at any time
- Point in time Branch content equals the Revision content at that point in time
 - Latest Revision holds the content of the Branch at its current end point
- A new Branch can be created from any Revision along another Branch
- Branch content (from any Revision) can be merged into the latest Revision of another Branch
- A Branch can be retired

Revision & Tag

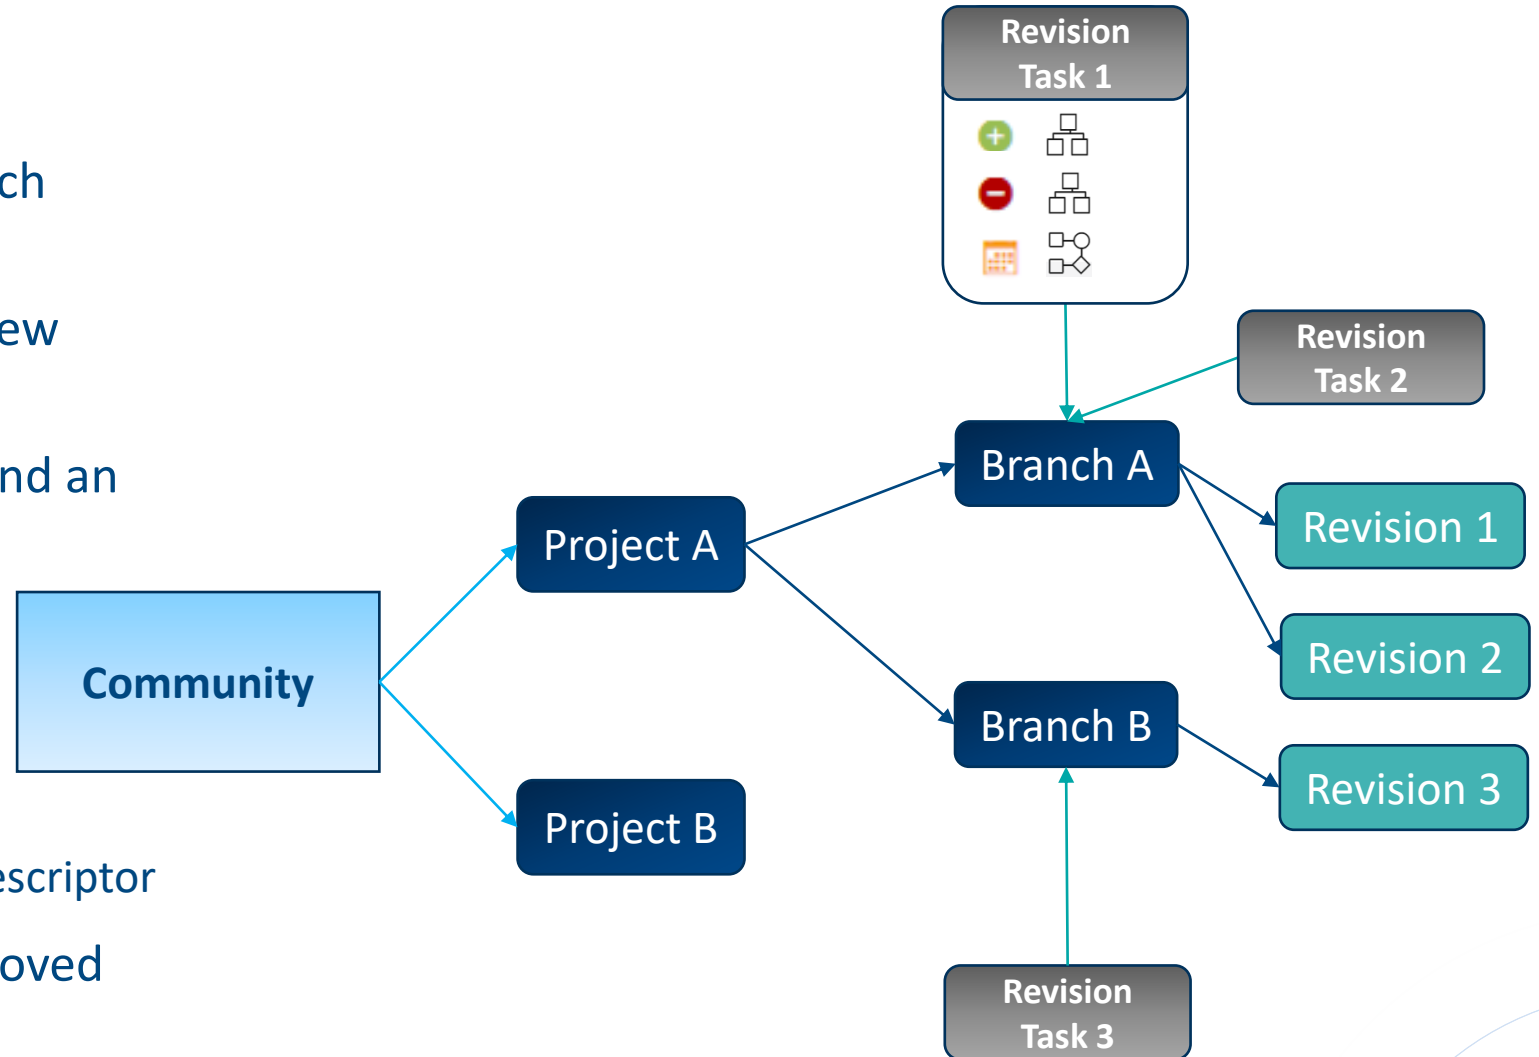

- A **Revision** is a self-contained snapshot of the Branch collection of approved/candidate assets and its Deployment Descriptors
 - Revision ID is an auto-generated sequential number and cannot be changed
 - Revisions are created in sequential order, a new Revision is always created after last Revision
- A **Tag** is a Revision with a customizable label (usually meaningful for the organization)
 - Tag Revisions are shown on the screen with tag icon  and label instead of Revision ID
- The list of assets and its **Deployment Descriptors** included in a Revision (Snapshot/Tag) cannot be changed
- Custom Properties for Revision (Snapshot/Tag) can be changed at any time and are implemented immediately
- A Deployment is performed on a Revision (Snapshot/Tag)

Revision Task

A **Revision Task** is the means by which Branch content is changed

- Each Revision Task creates one new Revision in the Branch
- A Revision Task contains assets and an action per asset
- Actions are:
 - ➕ Add asset to Branch
 - ➖ Remove asset from Branch
 - 📅 Change asset Deployment Descriptor
- A Revision Task needs to be approved before it is applied

Demo

- Create Release Project (in a Community that has no DD Custom Properties)
 - Use Approval Strategy None
- Create Revision Task 1
 - Add asset A V1.0
- Create Revision Task 2
 - Add assets B, C
- Show Revision Graph
- Create Revision Task 3
 - Add asset A version V1.1
 - Show auto adjustment of dates
 - Remove asset B
 - Don't submit Revision Task 3 for approval
- Tag Revision 2 as Tag1

Agenda

- Introduction
- **Release Management**
- Approval Strategy

Create a Release Project

1. Select the [Repository](#) tab and choose a Community in the navigation tree and select an existing Project or click [+Add Project](#) to add new
2. Insert a unique [Project Name](#) and optionally a description
3. Set the [Approval Strategy](#)
4. Assign owners to Approval Strategy for the Project (All/Any/None)
5. Optionally, add a [Responsibility](#) description for each approver (owner)
6. Optionally, a Project can contain [Custom Properties](#)

The screenshot displays the SAPIENS Decision web application interface. The top navigation bar includes tabs for Home, Tasks, Repository, and Reports. The 'Repository' tab is active, showing a list of projects under the 'Release Projects' sub-tab. A blue circle highlights the '+Add Project' button, with a '1' next to it. Below this, a 'Create New Project' dialog is open, showing a 'Project Name' field with the value 'Training Project' and an 'OK' button. A blue circle highlights the 'Project Name' field, with a '2' next to it. The dialog also shows an 'Approval Strategy' dropdown set to 'Any' and a 'Distinct User' toggle. A table with columns 'NAME' and 'RESPONSIBILITY' is visible, with a blue circle highlighting the 'NAME' column, with a '4' next to it. The 'NAME' column contains the value 'Lisa Jones'. A blue circle highlights the 'RESPONSIBILITY' column, with a '5' next to it. The 'Properties' section at the bottom shows a 'Project Prop 1' field. A blue circle highlights the 'Properties' section, with a '6' next to it. The 'Release Project' tab is selected in the left sidebar.

4 (Currently no assets in Branch)			

The **Revision Task** applies to the latest Branch-Revision content

1. **Bread crumb** enables easy positioning and navigation
2. Use Vertical Tabs to adjust the Revision Request content
3. The Details Tab on the left contains Revision Request ID, Description, Modeling Project, Project Name, Modeling Task Name, Creator, and Creation Date
4. Display shows current Revision Task content and impact of changes on the latest Revision

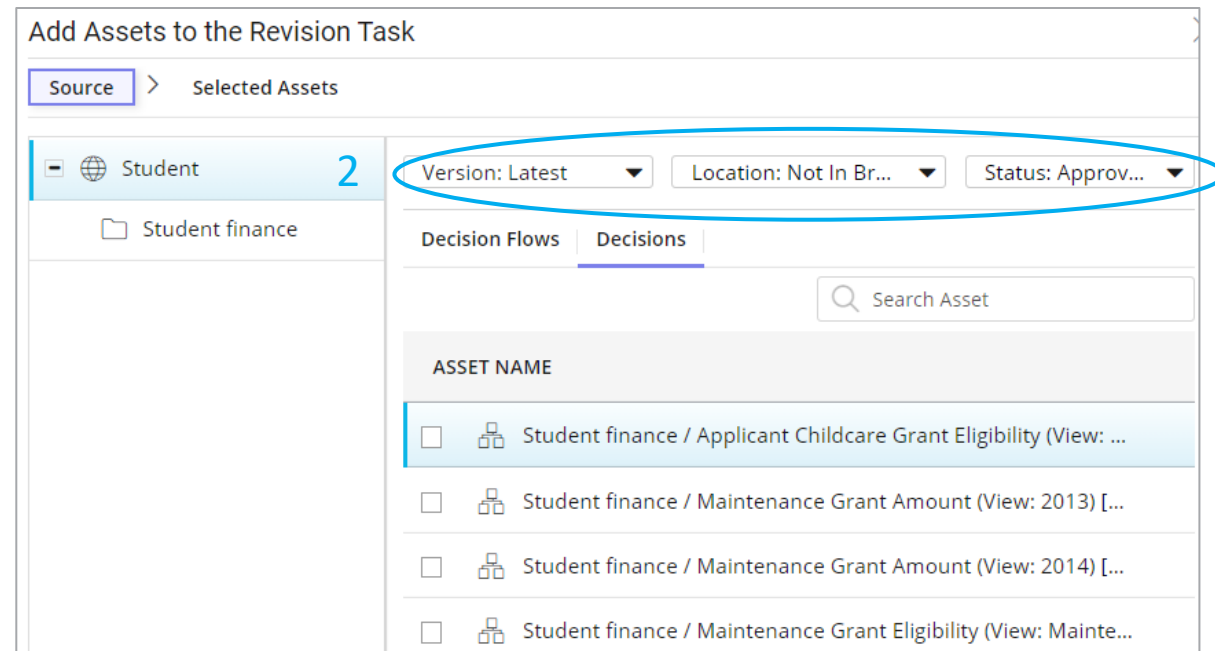

Add Assets to Revision Task

1. To add assets to the Revision Task, click the  button

The screenshot shows the 'Revision Task' interface for 'Revision Task 1045914'. The breadcrumb trail is 'Student > Training Project > Main > 1045684 (Latest) > Revision Task 1045914'. The interface includes buttons for 'Refresh', 'Validate', 'Modify Dates', 'Remove', 'Descriptor View', and a toggle for 'OFF' and 'ON'. A yellow 'DRAFT' button is also present. The '+Add' button is circled in blue with the number '1' above it. Below the buttons is a table with columns: 'ASSET NAME', 'STATUS', 'EFFECTIVE DATE', and 'EXPIRATION DATE'.

2. Use [filter options](#) to locate assets

The screenshot shows the 'Add Assets to the Revision Task' dialog. The 'Source' tab is selected, showing a tree view with 'Student' and 'Student finance'. The 'Selected Assets' tab is also visible. Filter options are circled in blue with the number '2' above them: 'Version: Latest', 'Location: Not In Br...', and 'Status: Approv...'. Below the filters is a search bar labeled 'Search Asset'. A list of assets is shown, including 'Student finance / Applicant Childcare Grant Eligibility (View: ...)', 'Student finance / Maintenance Grant Amount (View: 2013) [...]', 'Student finance / Maintenance Grant Amount (View: 2014) [...]', and 'Student finance / Maintenance Grant Eligibility (View: Mainte...)'.

Add Assets to Revision Task

1. Multiple selection is available
2. The default Effective Date can be changed for the selected assets
 - If provided, the Effective Date will be set for all selected assets
 - It is not mandatory to add/modify Effective Date now, it can be done later

Add Assets to the Revision Task

Descriptor View

The screenshot shows the SAPIENS Revision Task interface. At the top, the breadcrumb navigation reads: Student > Training Project > Main > 1045684 (Latest) > Revision Task 1045914. Below this, there's a 'Revision Task' section with buttons for 'Refresh', 'Validate', 'Modify Dates', and 'Remove'. To the right of these buttons is a toggle for 'Descriptor View' (currently set to 'ON'), with a '1' next to it. Further right are '+Add' and 'Submit' buttons. Below the buttons is a yellow 'DRAFT' label. The main area is a table with columns: ASSET NAME, EXPIRATION DATE, IN PRODUCTION, RETIRED, SUBMISSION DATE, and DESCRIPTOR ID. The first row of data is for 'Applicant Childcare Grant Eligibility (View: Base) [V1.2]'. A '2' points to the three-dot menu icon next to the asset name. A context menu is open, showing options: Clone, Edit Deployment Descriptor (circled with a '3'), Remove, Revert, and Retire.

ASSET NAME	EXPIRATION DATE	IN PRODUCTION	RETIRED	SUBMISSION DATE	DESCRIPTOR ID
Applicant Childcare Grant Eligibility (View: Base) [V1.2]		☐	☐	Sep 1, 2021, 3:05:25 PM	2576548572290

1. By turning on **Descriptor View** ☐ OFF ☒ ON it can be viewed whether the asset is in production or retired in addition to the Submission Date and Descriptor ID
2. The **Edit Deployment Descriptor** option can also be accessed by hovering to the right of the asset name and clicking
3. Custom Deployment Descriptor criteria may be added by an administrator

Effective and Expiration Dates

Effective & Expiration Dates for each asset can be changed using **Edit Deployment Descriptor**

- If a default Effective Date is added to the Branch when adding a new asset to the Revision Task, it is not necessary to specify an Effective Date
- If a default Effective Date is not added to the Branch and there is only one version of the asset, the Effective Date will be “Always Effective”
- If there are multiple versions of the asset and no effective and expiration dates, an overlapping error will occur

The screenshot shows a dialog box titled "Edit Deployment Descriptor - 'Applicant Childcare Grant Eligibility (View: Base) [V1.2]'". It contains several fields and checkboxes:

- Status:** A dropdown menu showing "APPROVED".
- Not Latest Version:** A checkbox that is currently unchecked.
- Validity:** A section containing two date fields:
 - Effective Date:** A text field with the placeholder "Effective Date", a calendar icon, and a clock icon. To its right is a checkbox labeled "Clear Date".
 - Expiration Date:** A text field with the placeholder "Expiration Date", a calendar icon, and a clock icon. To its right is a checkbox labeled "Clear Date".
- In Production:** A checkbox that is currently unchecked.
- Retired:** A checkbox that is currently unchecked.
- Submission Date:** A text field showing "Sep 1, 2021, 3:05:25 PM".
- Descriptor ID:** A text field showing "25765485722900".

At the bottom right of the dialog are two buttons: "Cancel" and "Edit".

Effective and Expiration Dates

When adding a new Version of an asset to a Revision Task and Effective Date is inserted, the Expiration Date of the previous version of the asset will be changed automatically according to the Effective Date of the new version.

If necessary, the user can change the Effective Date manually.

Claim

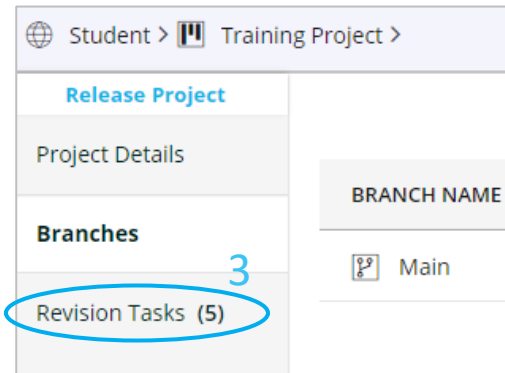

Approve the Revision Task

1. The submitted Revision Task can be directly Approved or Rejected from the Revision Task by the Owner/s defined under the Project Approval Strategy
 - Requests in Candidate status are not editable
2. The Revision Task content is usually viewed before an Approve/Reject action is taken
 - The included assets can be viewed by clicking on the Asset Name
3. After being claimed, the owner can also access Revision Tasks for review using the Release Project vertical tab on the left

The screenshot shows the 'Revision Task' interface for 'Revision Task 1045914'. The breadcrumb trail is 'Student > Training Project > Main > 1045684 (Latest) > Revision Task 1045914'. The interface includes a 'Details' tab, a 'Assets' section, and a 'Candidate' status indicator. A table lists the assets, with the first asset 'Applicant Childcare Grant Eligibility (Vie...' circled in blue. The 'Approve' button in the top right corner is also circled in blue.

ASSET NAME	STATUS	EFFECTIVE DATE	EXPIRATION DATE
Applicant Childcare Grant Eligibility (Vie...	✓ APPROVED	Dec 1, 2021, ...	

The screenshot shows the 'Release Project' interface. The breadcrumb trail is 'Student > Training Project >'. The interface includes a 'Project Details' section, a 'Branches' section, and a 'Revision Tasks (5)' link circled in blue.

Demo

- Set the Approval Strategy of the Release Project to All and set yourself as owner
- Submit Revision Task 3
- Look at the Task List for the owner task
- Approve the Task

Add Assets to Revision Task from a Modeling Task

- Another way to create a Revision Task and add assets to it is from within a Modeling Task
- When a Revision Task is in Candidate, Approved, or Completed status, an option to generate a Revision Task becomes available

The screenshot shows the 'Training Task' interface. On the left is a sidebar with a 'Tasks' section and a 'Details' section containing links for 'Decision Flows', 'Decisions', 'Rule Families', and 'Fact Types'. The main area has a 'Tasks' tab and a 'Details' tab. In the 'Details' tab, there is a yellow 'DRAFT' button. Below it are tabs for 'GENERAL', 'ASSET APPROVAL', 'FACT TYPE APPROVAL', 'AUDIT', and 'RELEASE MANAGEMENT'. The 'RELEASE MANAGEMENT' tab is active, showing 'Release Project' (Select Project) and 'Branch' (Select Branch) fields, each with a 'Change' link.

The screenshot shows the 'Training Task' interface in a different state. The 'COMPLETED' button is highlighted with a blue circle. Below the tabs, the 'Create Revision Task' button is also highlighted with a blue circle. The 'Release Project' field now contains 'Training Project' and the 'Branch' field contains 'Main', both with 'Change' links.

Add Assets to Revision Task from a Modeling Task

- 1. Click 
- 2. Choose Project and Branch and click 
- 3. Revision Task is generated

DRAFT

		ASSET NAME	STATUS	EFFECTIVE DATE	EXPIRATION DATE
☐	+	Applicant Childcare Grant Eligibility (View: Base) [V1.2]	✓ APPROVED	Dec 1, 2021, 12:00...	
☐	+	Maintenance Loan Eligibility (View: Maintenance) [V1.2]	CANDIDATE		

- A Candidate asset can be added to a Revision Task and the request can be submitted
- After submission, the status of the asset may change through the workflow to Rejected or Approved

Revision Task with Candidate Assets

- If an asset is rejected, it is not possible to approve the Revision Task and a validation error icon will be displayed
- The requestor should change the assets and resubmit
- If the rejected asset was resubmitted unchanged, then it becomes a Candidate again (or Approved) and the Revision Task can be resubmitted
- If the rejected asset was changed and resubmitted, then the rejected asset should be removed from the Revision Task and new asset can be added instead

The screenshot shows the 'Revision Task' interface for 'Revision Task 1045914'. The breadcrumb trail is 'Student > Training Project > Main > 1045684 (Latest) > Revision Task 1045914'. The interface includes a 'Revision Task' tab, a 'Details' section, and an 'Assets' table. The 'Assets' table has columns for 'ASSET NAME', 'STATUS', 'EFFECTIVE DATE', and 'EXPIRATION DATE'. There are two assets listed: 'Applicant Childcare Grant Eligibility (View: Base) [V1.2]' with a status of 'APPROVED' and 'Maintenance Loan Eligibility (View: Maintenance) [V1.2]' with a status of 'REJECTED'. The 'REJECTED' status is circled in red. Above the table, there are buttons for 'Refresh', 'Validate', 'Modify Dates', and 'Remove', along with a 'Descriptor View' toggle (OFF/ON), an '+Add' button, and a 'Submit' button. A 'DRAFT' button is also visible.

ASSET NAME	STATUS	EFFECTIVE DATE	EXPIRATION DATE
Applicant Childcare Grant Eligibility (View: Base) [V1.2]	APPROVED	Dec 1, 2021, 12:00...	
Maintenance Loan Eligibility (View: Maintenance) [V1.2]	REJECTED		

The screenshot shows the 'Revision Task' interface for 'Revision Task 1045914' after a validation error. A red banner with a white 'X' icon and the text 'Revision Task Validation' and 'Revision Task validation completed with errors' is displayed. The 'Assets' table is the same as in the previous screenshot, but the 'Maintenance Loan Eligibility (View: Maintenance) [V1.2]' asset now has a red 'REJECTED' status. A tooltip is visible over the 'REJECTED' status, stating: 'The asset 'Maintenance Loan Eligibility (View: Maintenance) V1.2' added in this Revision Task has been rejected and must be replaced or removed.' The interface also includes a 'Details' section, a 'Revision Task' tab, and buttons for 'Refresh', 'Validate', 'Modify Dates', and 'Remove'. The 'Descriptor View' toggle is set to 'OFF', and there are '+Add' and 'Submit' buttons. An 'Additional Info' sidebar is visible on the right.

ASSET NAME	STATUS	EFFECTIVE DATE	EXPIRATION DATE
Applicant Childcare Grant Eligibility (View: Base) [V1.2]	APPROVED	Dec 1, 2021, 12:00...	
Maintenance Loan Eligibility (View: Maintenance) [V1.2]	REJECTED		

Revision Task with Candidate Assets

If there is a rejected asset in a Revision:

1. Adding another asset (which is not a version of the rejected asset) and submitting is supported and there will be a validation warning

The screenshot shows the 'Revision Task' interface for '1047324 (Latest)'. The 'Assets' table lists three items: 'Applicant Childcare Grant Eligibility (View: Base) [V1.2]' (APPROVED), 'Maintenance Loan Eligibility (View: Maintenance) [V1.2]' (REJECTED), and 'Tuition Fee Loan Amount (View: Tuition) [V1.1]' (APPROVED). A yellow 'DRAFT' button is visible. A validation warning is displayed: 'Note that rejected asset 'Maintenance Loan Eligibility (View: Maintenance) V1.2 ' is included in the revision.'

ASSET NAME	STATUS	EFFECTIVE DATE	EXPIRATION DATE
Applicant Childcare Grant Eligibility (View: Base) [V1.2]	APPROVED		
Maintenance Loan Eligibility (View: Maintenance) [V1.2]	REJECTED		
Tuition Fee Loan Amount (View: Tuition) [V1.1]	APPROVED		

Submit for Approval

Note that rejected asset 'Maintenance Loan Eligibility (View: Maintenance) V1.2 ' is included in the revision.

Are you sure you want to submit anyway?

Buttons: Cancel, Submit Anyway

2. If adding another version of the rejected item - the rejected item must be removed before submission

The screenshot shows the 'Revision Task' interface with the 'Assets' table. The 'Maintenance Loan Eligibility (View: Maintenance) [V1.2]' item is highlighted. A context menu is open over it, showing options: 'Modify Dates', 'Remove', and 'Revert All'. The 'Remove' option is circled in blue. A yellow 'DRAFT' button is visible.

ASSET NAME	STATUS	EFFECTIVE DATE	EXPIRATION DATE
Applicant Childcare Grant Eligibility (View: Base) [V1.2]	APPROVED		
Maintenance Loan Eligibility (View: Maintenance) [V1.2]	REJECTED		
Maintenance Loan Eligibility (View: Maintenance) [V1.1]	APPROVED		

Revision Task Conflict

Revision Task Conflict

The screenshot displays the SAPIENS Revision Task interface. The breadcrumb trail at the top reads: Student > Training Project > Main > 1045661 (Latest) > Revision Task 1045767. The interface includes a left sidebar with 'Revision Task' and 'Assets' sections. The main area features a toolbar with 'Refresh', 'Validate', 'Modify Dates', and 'Remove' buttons, along with a 'Descriptor View' toggle (currently OFF) and '+Add' and 'Submit' buttons. A yellow 'DRAFT' button is also present. Below the toolbar is a table with columns: ASSET NAME, STATUS, EFFECTIVE DATE, and EXPIRATION DATE. The table contains one entry: 'Maintenance Grant Eligibility (View: Maintenance) [V1.0]' with an effective date of 'Oct 1, 2021, 12:00:00 AM'. A context menu is open over the table entry, showing options: 'Modify Dates', 'Remove', and 'Revert All'. The 'Revert All' option is circled in blue.

- The second revision task must be modified, by **reverting** and updating as needed
- The **revert** action:
 - Undoes the requested asset date change
 - Refreshes the asset dates from the latest approved Revision Task (= latest Revision)
- After clicking 'Revert' it is possible to edit the Revision Task, if still necessary

Branch – Revision

- Once the Revision Task is approved, a new Revision is created
- Revision content is not editable
 - Only Revision custom properties are editable

Tag

- You can change a Revision's number to a meaningful name through a **Tag**
- Tags are Revisions that cannot be modified once created
- **Tags** are typically used for final deployment packages while **Snapshots** are typically used for testing purposes of assets still under development
- A Tag name must be unique within a Project

1. Click **Tag** button from menu
2. Insert Tag Name
3. It is possible to 'Untag' the revision by clicking **Untag** button

The screenshot shows the SAPIENS Decision web application. The top navigation bar includes 'Home', 'Tasks (5)', 'Repository', and 'Reports'. The breadcrumb trail is 'Student > Deployment Training Project > Main > 1047523 (Latest)'. On the left sidebar, the 'Revision' section is active. In the main area, the 'Tag' button is circled with a red circle and the number 1. Other buttons visible include 'Refresh', 'Merge', 'Compare', 'New Branch', 'Deployment Validation', 'Descriptor View' (with a toggle switch set to 'OFF'), 'Create Revision Task', and 'Deploy'. Below the buttons is a table with columns: 'ASSET NAME', 'STATUS', 'EFFECTIVE DATE', and 'EXPIRATION DATE'. The table contains two rows: 'Applicant Childcare Grant Eligibility (View: Base) [V1.2]' and 'Training Decision 1 (View: Base) [V1.0]', both with a green 'APPROVED' status.

The screenshot shows a 'Create New Tag' dialog box. It has a close button (X) in the top right corner. The 'Tag Name' field is required (indicated by an asterisk) and contains the text 'Tag1', which is circled with a red circle and the number 2. At the bottom right of the dialog are 'Cancel' and 'OK' buttons.

The screenshot shows the SAPIENS Decision web application after the tag has been created. The breadcrumb trail is 'Student > Deployment Training Project > Main > Tag1 (Latest)'. The 'Revision' section is still active on the left. In the main area, the 'Untag' button is circled with a red circle and the number 3. Other buttons visible include 'Refresh', 'Merge', 'Compare', 'New Branch', 'Deployment Validation', 'Descriptor View' (toggle switch set to 'OFF'), 'Create Revision Task', and 'Deploy'. The table below shows the same two assets as before, both with 'APPROVED' status.

Deploy Revision – Tag

Sep 7, 2021, 1:49:52 PM	DEPLOYED	Tag1	1047334	Deployment Training ...	DE

1. To see deployment request status, select **Deployment History** from the Revision tab
2. Approval Strategy for every environment is defined in the Community Admin
 - When the deployment is approved, the status will be changed to 'Deployed'

Approve/Reject Deploy Request

1. To approve: the owner can access the Deployment Task from their Task List in Deployment Tasks
2. The Owner(s) can Approve or Reject the Deployment Request

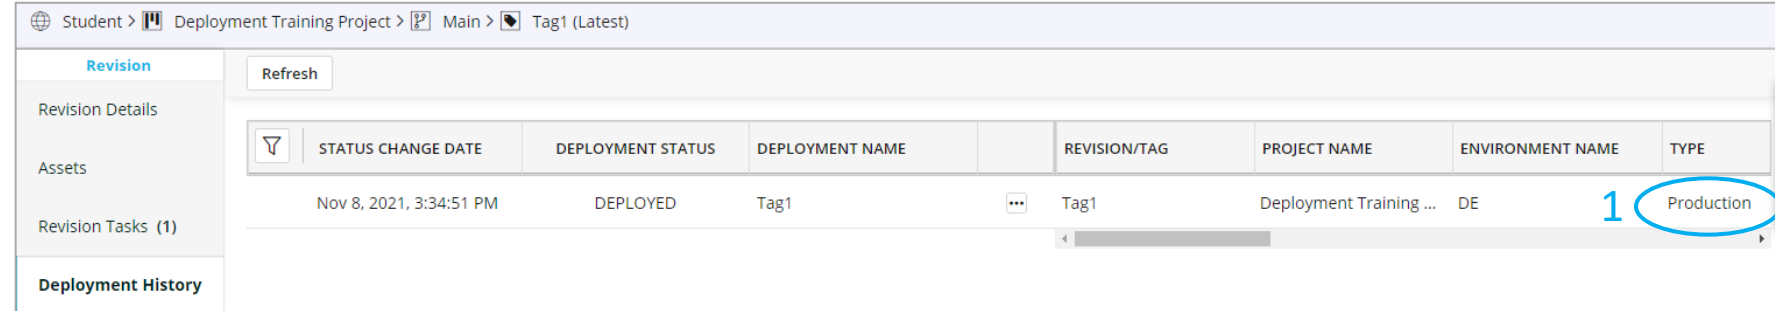

The screenshot displays the SAPIENS Decision web application. The top navigation bar includes links for Home, Tasks (9), Repository, Reports, and Administration. The 'Tasks (9)' tab is active, and within it, the 'Deployment Tasks (1)' sub-tab is selected and circled with a blue line and labeled with a blue '1'. Below this, a table lists deployment tasks. The first task, ID 1047106, is in a 'REQUESTED' state. To the right of the table, a detailed view for task 1047106 shows fields for Creator (Lisa Jones), Deployment Name (Tag1), Status (REQUESTED), and Community (Student), along with a 'Claim' button. A breadcrumb trail at the bottom reads: Student > Deployment Training Project > Main > Tag1 (Latest) > Deployment Task 1047106 >. Below the breadcrumb, a left sidebar contains links for 'Deployment Task', 'Details', 'Assets', 'Deployment History', and 'Mapped Entities'. The main content area shows a 'Compare' dropdown, a 'Deployment Validation' button, and a 'Descriptor View' toggle set to 'OFF'. A dropdown menu is open, showing 'Approve' and 'Reject' options, with 'Approve' circled in blue and labeled with a blue '2'. Below this, a table lists assets with their status and effective dates.

In Production Assets and Effective Dates

- With appropriate permissions, a Validation Warning will occur when an in-production asset's Effective Date is changed

The screenshot shows a web application interface for a 'Revision Task'. The breadcrumb trail is 'Student > Training Project > Main > 1046172 (Latest) > Revision Task 1045941'. The left sidebar has 'Revision Task' selected, with sub-items 'Details' and 'Assets'. The main area features a 'Revision Task Validation' warning banner: 'Revision Task validation completed with warnings'. Below this is a table with columns 'ASSET NAME', 'STATUS', and 'EFFECTIVE DATE'. One asset is listed: 'Applicant Childcare Grant Eligibility (View: Base) [V1.2]' with a status of 'APPROVED' and an effective date of 'Nov 30, 2021, 12:00:00 AM'. A tooltip for this asset states: 'The asset 'Applicant Childcare Grant Eligibility (View: Base) V1.2' Deployment Descriptor with Effective Date '11/30/2021 00:00:00' and Custom Properties " was modified even though it is exported or deployed to a production environment.' At the bottom, a 'Submit for Approval' dialog box asks: 'The asset 'Applicant Childcare Grant Eligibility (View: Base) V1.2' Deployment Descriptor with Effective Date '11/30/2021 00:00:00' and Custom Properties " was modified even though it is exported or deployed to a production environment. Are you sure you want to submit anyway?' with 'Cancel' and 'Submit Anyway' buttons.

Unmark Deployed

Redeploy

Compare with Latest Deployed

- **Redeploy** uses the already generated deploy package but with updated Release Information XML (Deploy Date, Environment Information and Deploy Owner Approvals)
- The target environment settings should be the same as the source environment settings (same Model Mapping, same Format definition)
- The target environment should have a repository definition
- The **Redeploy** action creates a new row in the deployment history
- Deploy to new environment will follow the new environment's Approval Strategy

Demo

- View Deployment History from current Branch
- Mark Tag1 as “Deployed”
- Show Additional Info for asset A
 - Show “Deployments” then “Environments”
- Click “More...” to view the full details of a deployment

Deployment History from Reports Tab

1. It is possible to access a history of Deployments from the Reports tab
2. Select Community, Environment, Project, and Tag from the list
3. All deployments from this Environment will be in this report

The screenshot shows the SAPIENS Decision web application. The top navigation bar includes 'Home', 'Tasks (49)', 'Repository', and 'Reports' (which is highlighted with a blue circle and a '1'). Below the navigation bar, there is a search bar and a list of reports. The 'Decision View Deployment Report' is highlighted with a blue circle and a '3'. To the right of the report list, there are filters for 'Community' (WORLD), 'Environment' (DE), 'Project' (Project), 'Tag' (Tag), and 'Branch' (Branch). These filters are also highlighted with a blue circle and a '2'. Below the filters, the 'Decision View Deployment Report' is displayed, showing parameters and a table of deployment history.

Compare Revisions

The screenshot shows the SAPIENS interface for comparing revisions. The breadcrumb path is: Student > Deployment Training Project > Main > Tag5 (Latest) > Compare. The 'Compare' button is circled in red and labeled with a red '1'. A dropdown menu is open, showing a search bar and a list of assets: Tag4, Tag3, Tag2, 1047593, 1047598, 1047553, and 1047577. The 'Assets' section on the left shows a list of assets with icons: Maintenance Gra, Maintenance Loa, and Tuition Fee Loan. The 'Assets' section is labeled with a red '2'. The right side of the interface shows a table with columns: STATUS, EFFECTIVE DATE, and EXPIRATION DATE. The table contains three rows, all with a status of 'APPROVED' and an expiration date of 'Nov 30, 2021, 12:00:00 AM'.

STATUS	EFFECTIVE DATE	EXPIRATION DATE
✓ APPROVED		Nov 30, 2021, 12:00:00 AM
✓ APPROVED	Oct 1, 2021, 12:00:00 AM	
✓ APPROVED		Nov 30, 2021, 12:00:00 AM

1. To compare a Revision with one of the previous Revisions of the same Branch, use the **Compare** menu and select the Revision to compare with
2. The changes between the Revisions are marked with icons

Icon Legend

- Asset Added
- Asset Removed
- Deployment Descriptor Added
- Deployment Descriptor Changed
- Deployment Descriptor Removed

Compare Revisions Report

- The 'Project/ Branch Compare Report' lists asset-level differences between two selected Revisions or two latest Revisions if an entire Branch is selected
- The Compare Report includes a list of added assets that exist in the 'compared' Revision but not in the 'source' Revision
- Assets that do not appear in the compare Revision, but do exist in the source Revision are marked as deleted assets
- Unchanged assets (included if "Show changes only" is not checked) are marked as "No Change"

The screenshot displays the SAPIENS Decision web application interface. The top navigation bar includes links for Home, Tasks (52), Repository, Reports (active), and Administration, along with a search icon and a user profile labeled 'Administrator'. The left sidebar contains a list of report types, with 'Project/Branch Compare Report' highlighted and circled in blue. The main content area shows the configuration for this report. It includes a description: 'Project/Branch Compare Report showing differences (on asset level) between two selected revisions or head revisions if branch only is selected'. Below this, the 'Parameters' section contains several dropdown menus: Format (CSV File), Page Type (A4 Landscape), Output Type (Download), Community (Community), Source Project (Source Project), Source Tag (Source Tag), Source Branch (Source Branch), Source Revision (Source Revision), and Compare Project (Compare Project). A 'Generate Report' button is located at the bottom right of the configuration area.

Revision Graph

Click the Revision Graph button  from the Revision tab or select from the left vertical tab on the Project Screen to see all Revisions and Branches in the Project

The screenshot shows the 'Revision' tab in the 'Merge Training Project' interface. The breadcrumb path is 'Student > Merge Training Project > Main > Tag2 (Latest)'. The left sidebar contains 'Revision Details', 'Assets', 'Revision Tasks', 'Deployment History', and 'Mapped Entities'. The top navigation bar includes buttons for 'Refresh', 'Untag', 'Merge', 'Compare', 'New Branch', 'Deployment Validation', and 'Revision Graph' (circled in blue). Below these are 'Descriptor View' (OFF/ON toggle) and 'Create Revision Task' and 'Deploy' buttons. The main area displays a table of assets:

ASSET NAME	STATUS	EFFECTIVE DATE	EXPIRATION DATE
 Estimate FT-A (View: Base) [V1.0]	✓ APPROVED		
 Estimate FT-B (View: Base) [V1.0]	✓ APPROVED		

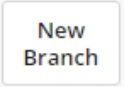

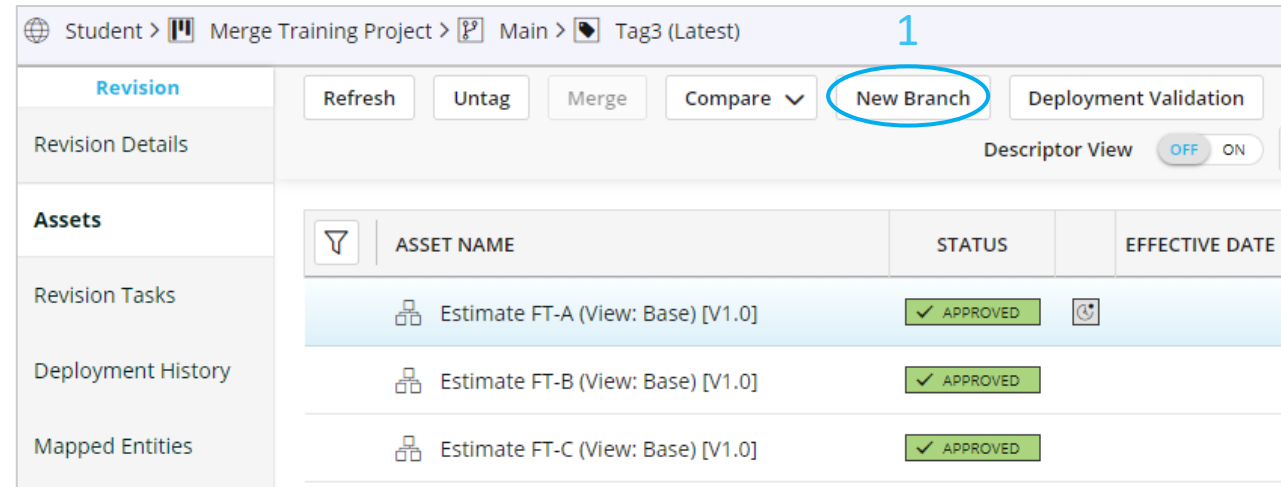

The screenshot shows the 'Release Project' tab in the 'Merge Training Project' interface. The breadcrumb path is 'Student > Merge Training Project >'. The left sidebar contains 'Project Details', 'Branches', 'Revision Tasks', and 'Revision Graph'. The top navigation bar includes 'Revisions List', 'Show Branch Creation Date', 'Filter Revisions' (From Date, To Date, Filter, Clear). The main area displays a graph of revisions. Annotations with arrows point to specific elements:

- Branch name:** Points to the 'Main' branch name in the left sidebar.
- Revision without Tag:** Points to the first node in the graph.
- Revisions with tag:** Points to the second and third nodes in the graph.
- Revision details (hover over):** Points to a tooltip showing 'Branch: Main', 'Revision: 1046088', 'Tag: Tag2', and 'Sep 9, 2021, 12:09:59 PM'.

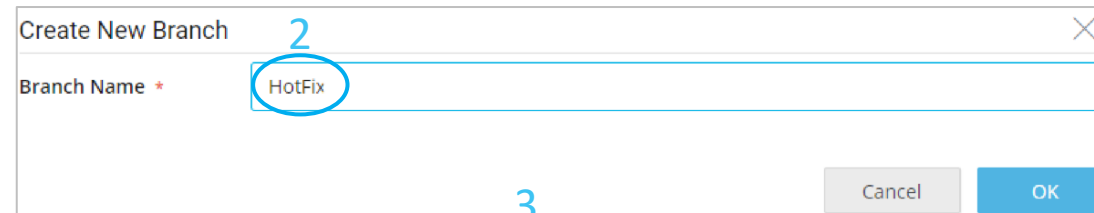

Create New Branch

Open the Branch and Revision from which the new Branch will be created

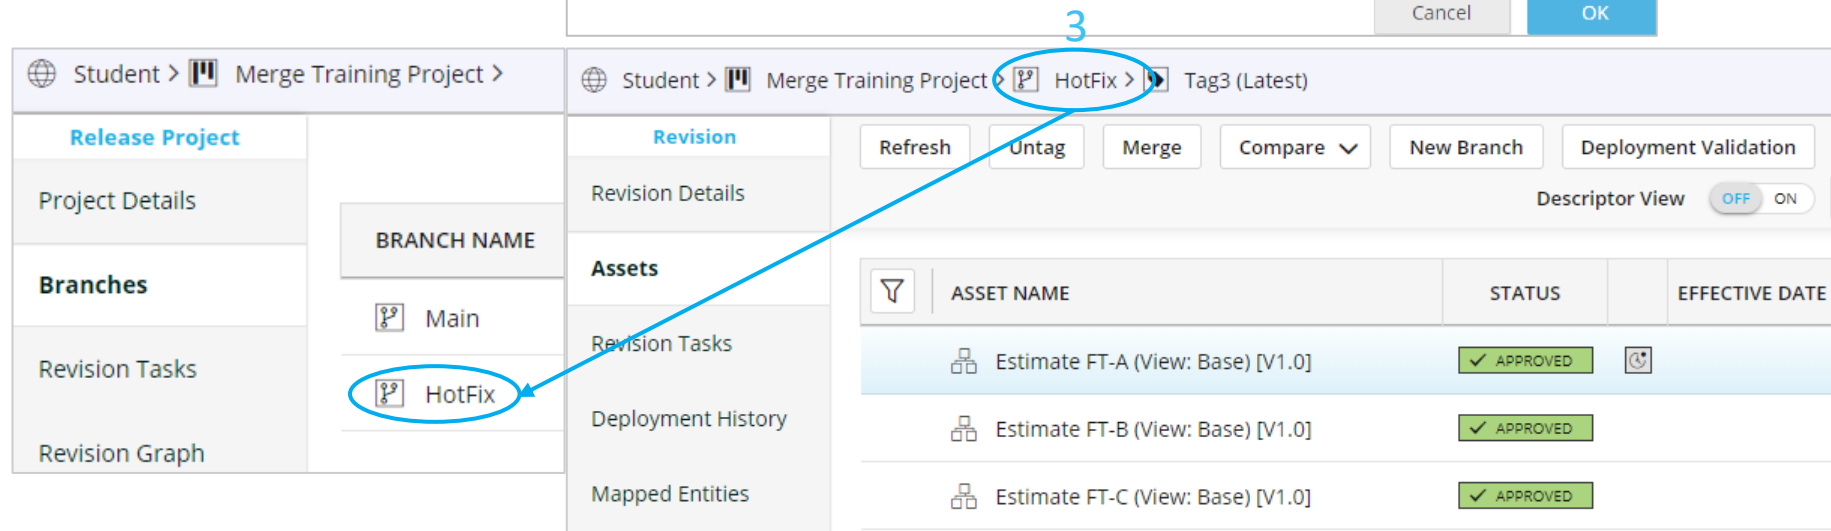

1. Click  button from the menu
2. Type the name of the new Branch
3. New Branch is created

The screenshot shows the 'Merge Training Project' interface. The breadcrumb navigation is 'Student > Merge Training Project > Main > Tag3 (Latest)'. The 'New Branch' button is circled in blue and labeled with a '1'. Below the navigation bar, there are buttons for 'Refresh', 'Untag', 'Merge', 'Compare', and 'New Branch'. To the right of these buttons is a 'Deployment Validation' button. Below the buttons is a 'Descriptor View' toggle set to 'OFF'. The main content area is a table with columns 'ASSET NAME', 'STATUS', and 'EFFECTIVE DATE'. It contains three rows of assets, all with a status of 'APPROVED'.

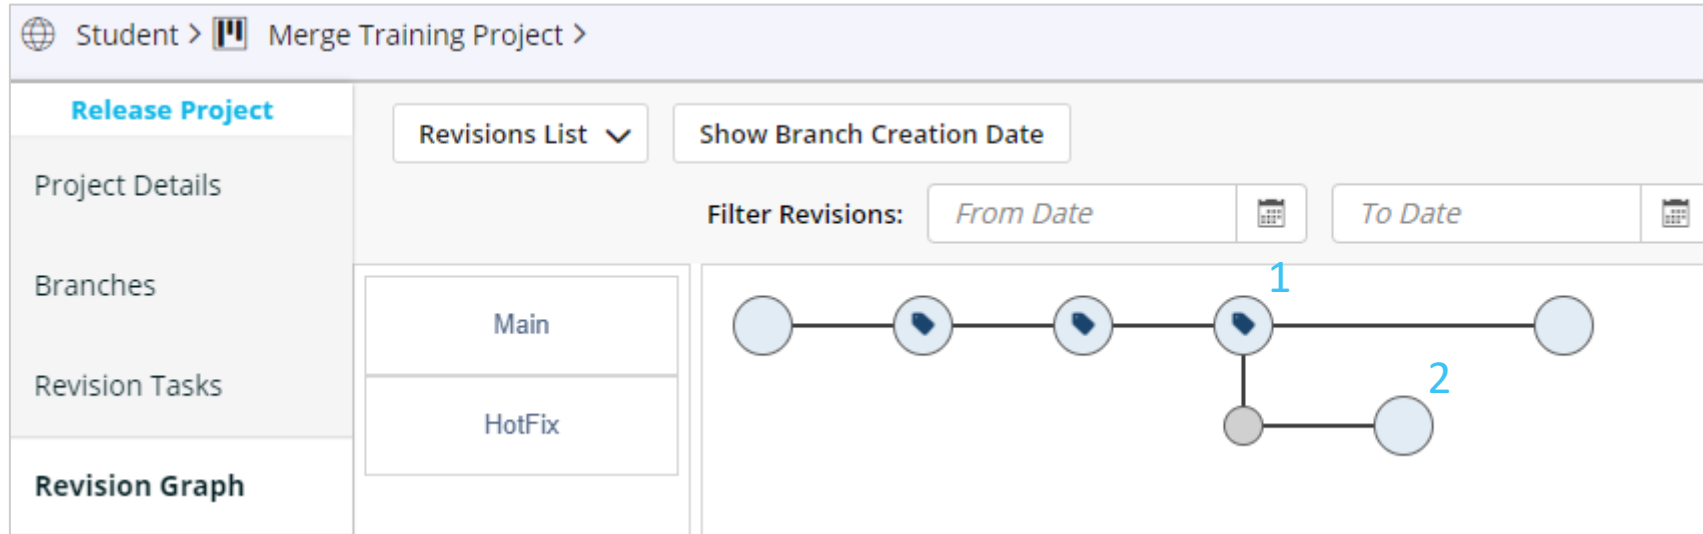

The screenshot shows the 'Create New Branch' dialog box. The 'Branch Name' field is circled in blue and labeled with a '2'. The text 'HotFix' is entered in the field. There are 'Cancel' and 'OK' buttons at the bottom right.

The screenshot shows the 'Merge Training Project' interface after the 'HotFix' branch has been created. The breadcrumb navigation is 'Student > Merge Training Project > HotFix > Tag3 (Latest)'. The 'New Branch' button is circled in blue and labeled with a '3'. Below the navigation bar, there are buttons for 'Refresh', 'Untag', 'Merge', 'Compare', and 'New Branch'. To the right of these buttons is a 'Deployment Validation' button. Below the buttons is a 'Descriptor View' toggle set to 'OFF'. The main content area is a table with columns 'ASSET NAME', 'STATUS', and 'EFFECTIVE DATE'. It contains three rows of assets, all with a status of 'APPROVED'. On the left side, there is a 'Branches' list with 'Main' and 'HotFix' entries. The 'HotFix' entry is circled in blue and labeled with a '3'.

Merge Branches

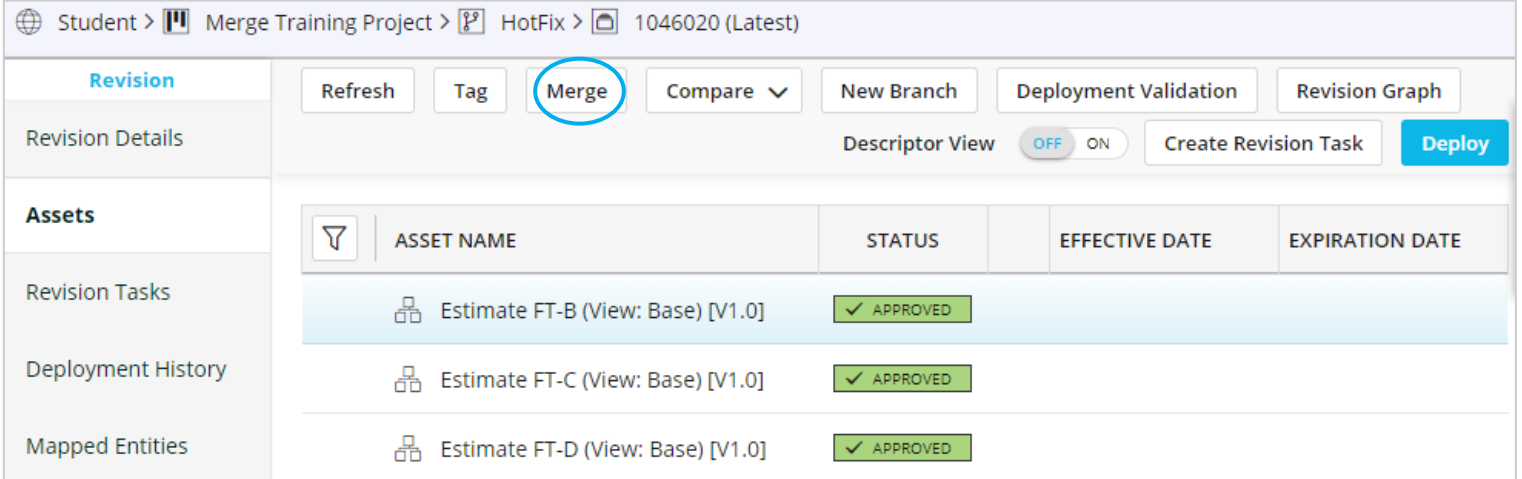

- **Merge** is between different branches within the same project
- Merge is supported from any Revision of one Branch to the latest Revision of another Branch
- The merge creates a Revision Task consisting of the **accumulated actions** on assets (additions, changes, and removals) made from the junction point of the branches (**point 1**) to the 'from' Revision (**point 2**)

Merge Branches

1. To merge, open the 'From' Branch Revision and click 
2. Select Destination 'To' Branch to merge and click 

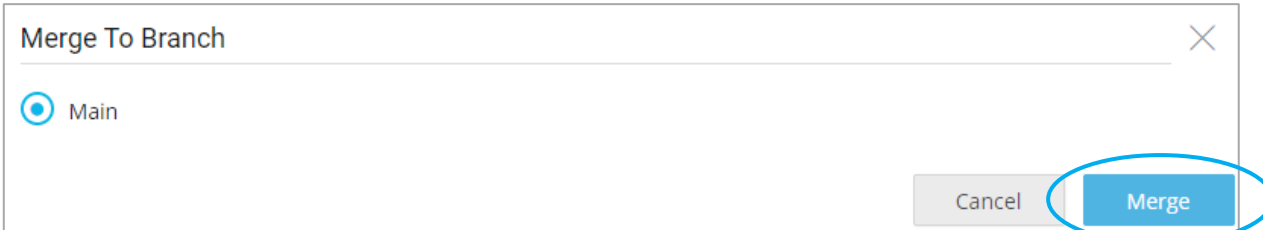

1

The screenshot shows the HotFix interface for the 'Merge Training Project'. The breadcrumb navigation is 'Student > Merge Training Project > HotFix > 1046020 (Latest)'. The 'Revision' tab is active, and the 'Merge' button is circled in blue. The interface includes a left sidebar with 'Revision Details', 'Assets', 'Revision Tasks', 'Deployment History', and 'Mapped Entities'. The main area shows a table of assets with columns for 'ASSET NAME', 'STATUS', 'EFFECTIVE DATE', and 'EXPIRATION DATE'. The table contains three rows, all with a status of 'APPROVED'.

ASSET NAME	STATUS	EFFECTIVE DATE	EXPIRATION DATE
Estimate FT-B (View: Base) [V1.0]	✓ APPROVED		
Estimate FT-C (View: Base) [V1.0]	✓ APPROVED		
Estimate FT-D (View: Base) [V1.0]	✓ APPROVED		

2

The screenshot shows the 'Merge To Branch' dialog box. It has a title bar with a close button. The main area contains a radio button labeled 'Main', which is selected. At the bottom right, there are two buttons: 'Cancel' and 'Merge'. The 'Merge' button is circled in blue.

Merge Branches

1. Resulting Revision Task on the Main branch with the accumulated changes (-A +D)
2. After submitting the Revision Task, the merged revision is created
3. Dotted arrow represents the merge

Revision Graph

Revision Graph Model Actions

When you right click on a Revision in the **Revision Graph**, you can make the following actions:

- **Open Revision:** Click Open Revision to view the Revision details of the asset
- **Show Deployment History:** Click Show Deployment History to view the deployment history of the asset
- **Create New Branch:** Click Create New Branch to add a new branch from this Revision
- **Merge this Revision:** Click Merge this Revision to select the target branch to merge into; a Revision Task will be created with the accumulated changes performed in the branch from the junction point to this Revision
- **Set Filter From Date:** Select Set Filter From Date to set a filter from the date of the revision
- **Set Filter To Date:** Select Set Filter To Date to set a filter to the date of the revision

Demo

- Create HotFix Branch from Tag1
- Create Revision Task 4 on the HotFix Branch and approve it
- Open Revision Graph and merge to Main Branch from Hot Fix
- Show Revision Graph after Merge

Retire Branch and Complete Project

1. On Branch screen click **Retire Branch** button
2. On Project Details screen click **Complete Project** button

Description

Approval Strategy None

Properties

Retire Branch and Complete Project

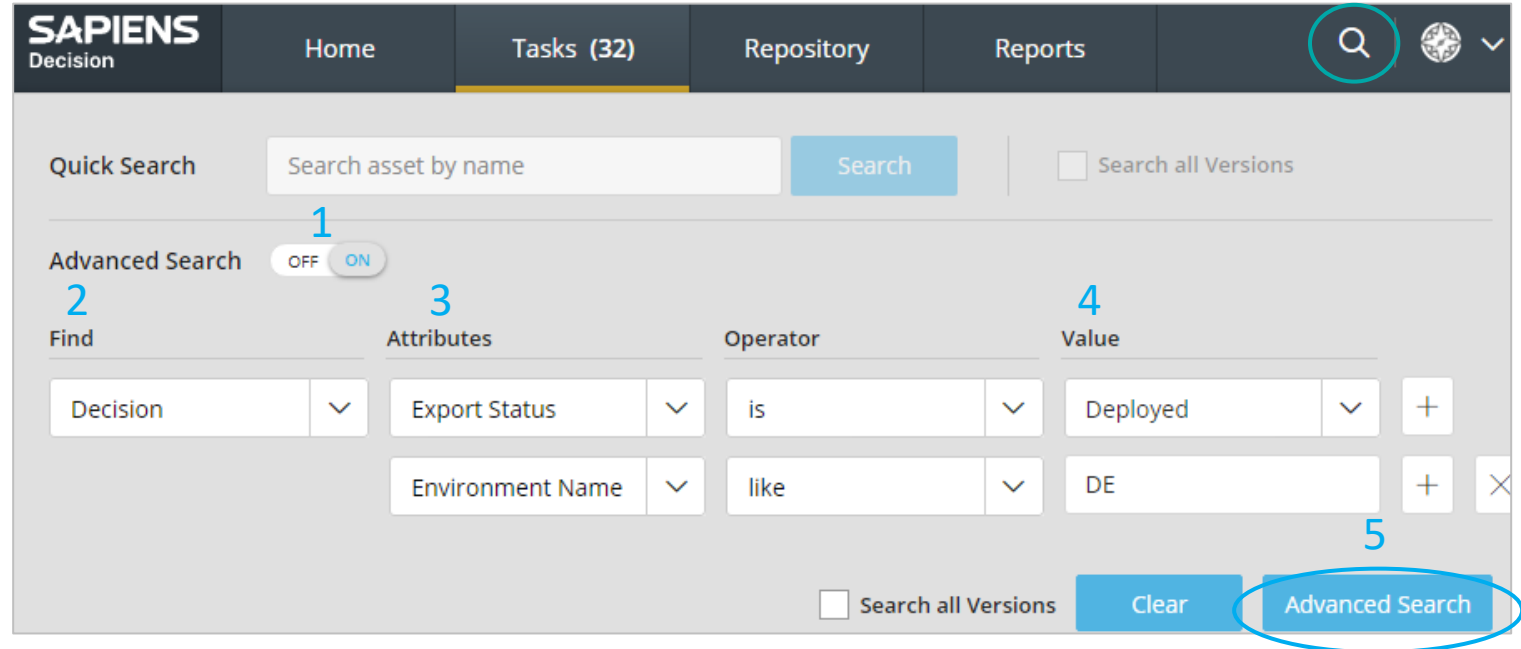

1. If there is only one Branch - it cannot be retired
2. When a Project is completed, all its associated Branches are retired
3. All submitted Revision Tasks or deployments are automatically rejected
 - All pending Revision Tasks are no longer available since the Branch has been retired

Advanced Search

Search for assets that were deployed using the search tool 

1. Turn Advanced Search on 
2. Select which asset type to find
3. According to which attributes
4. Based on the attribute, some values can be selected, and others must be manually input
5. Click  to run the query

Agenda

- Introduction
- Release Management
- **Approval Strategy**

Approval Strategy

- Approval Strategy is a generic mechanism that governs business process requests
- Approval Strategy applies to the following modules:

Environments: govern requests for deployment to Environments

NAME

RESPONSIBILITY

Approval Strategy

- In order to appear in the owners list, the user must have the relevant permission:

For Model Mapping - *MODEL_MAPPING_APPROVAL*
For Environments - *ENVIRONMENT_APPROVAL*
For Projects - *BRANCH_REVISION_APPROVAL*
- For Environments and Projects, in addition to the approval permission, the user must have permission for the Community

Approval Strategy Template

The Approval Strategy template definition has 2 sections:

1. Set Approval Strategy Type

- **None:** request instance is immediately approved and performed upon submission (no owners)
- **All:** all assigned owners must approve the request before it is performed
- **Any:** one of the assigned owners must approve the request before it is performed

Distinct User (applies to both **All** and **Any**): the user that submits the request cannot be the only approver of their own request

2. Set Owners and Responsibilities

- Assign users with permission to perform request
- Define responsibility (optional)

If one of the assigned owners rejects the request, then request is rejected altogether

1

2

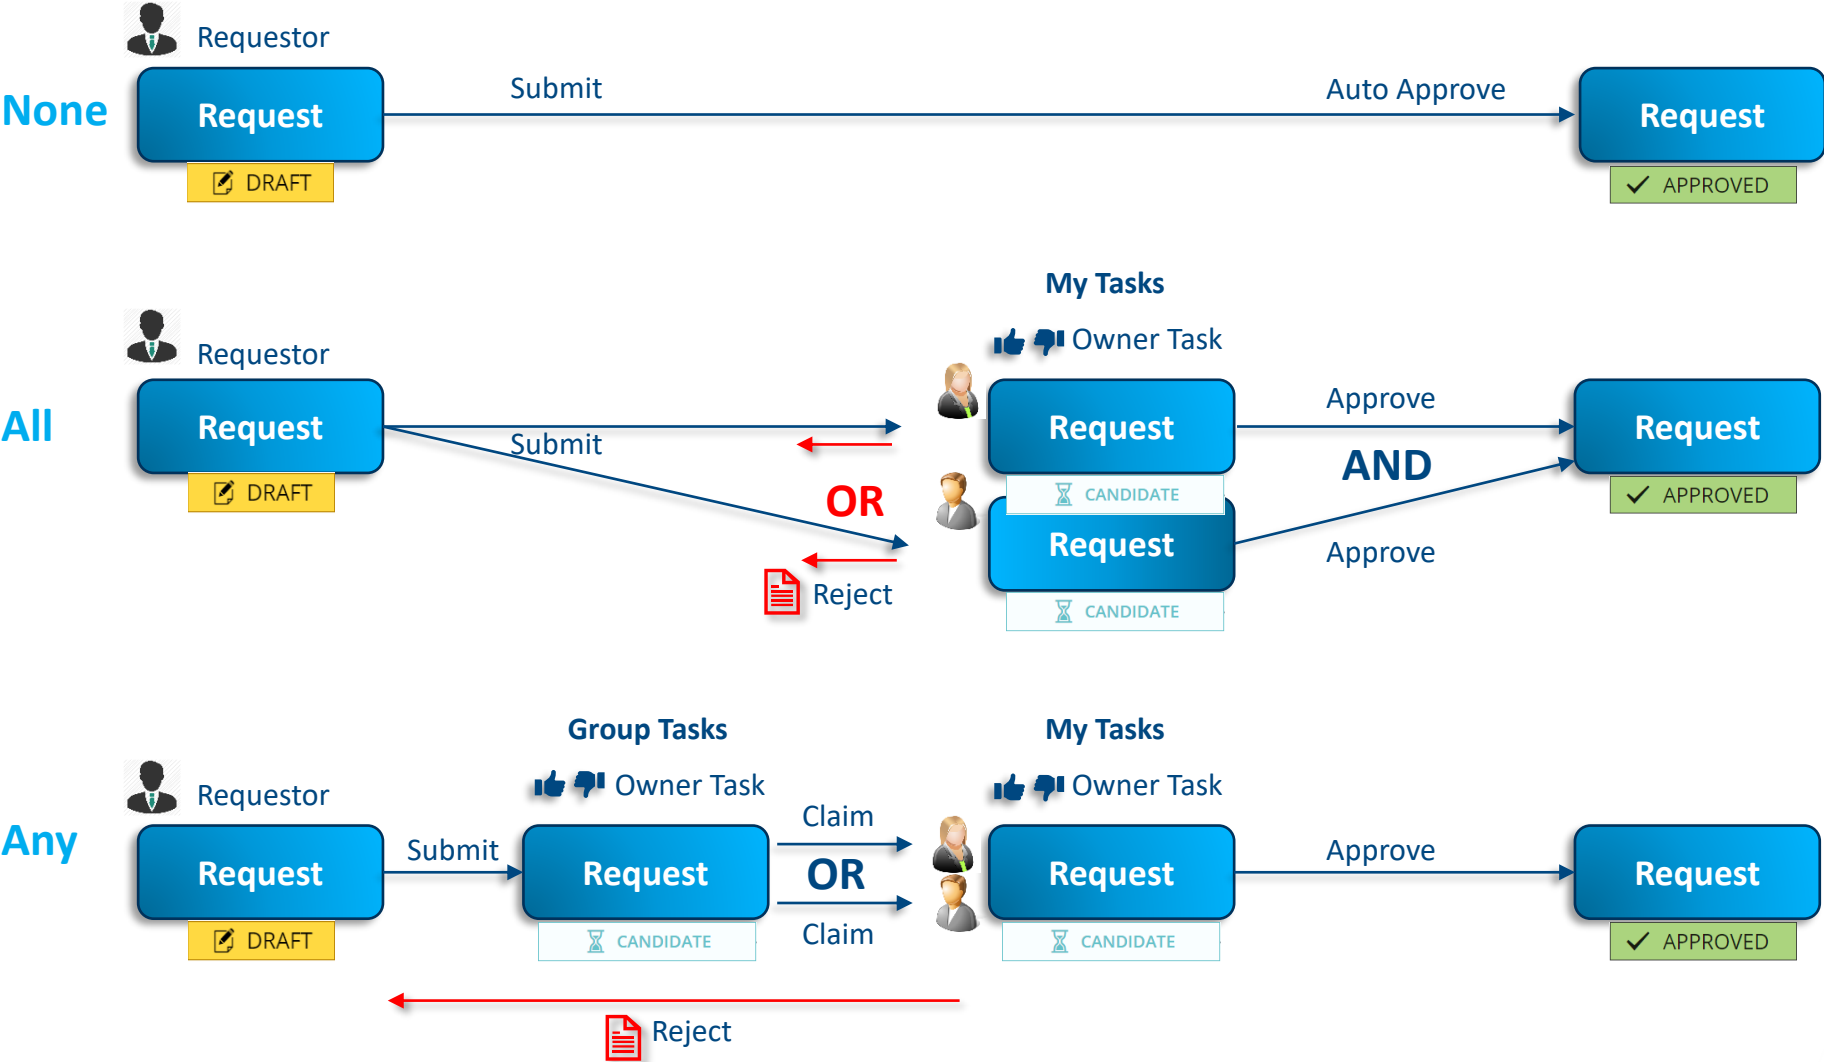

The screenshot shows the 'Approval Strategy' configuration interface. It includes a dropdown menu for selecting the strategy type (All, Any, None), a toggle switch for 'Distinct User', and a table for defining owners and responsibilities.
